

Custom Data Displays

Prepared by: Solar Analytics Sales Team

Date: Sep 2019

Bring your solar to life

Showcase your solar investment to the public, shareholders or key stakeholders

Simple & effective visualisation of solar production and energy consumption

Promote your brand and corporate identity

Easily display on web connected screens (but not on websites)

Works reliably with any solar system

No ongoing display costs

Today's total
solar production

194.4 kWh

Equivalent to planting

1296 trees

Powered by solar  analytics

Display options

Custom page display

- Single Solar Analytics site
- Single static page
- Production, consumption & customisable widgets

Custom Page Display

Custom fleet display

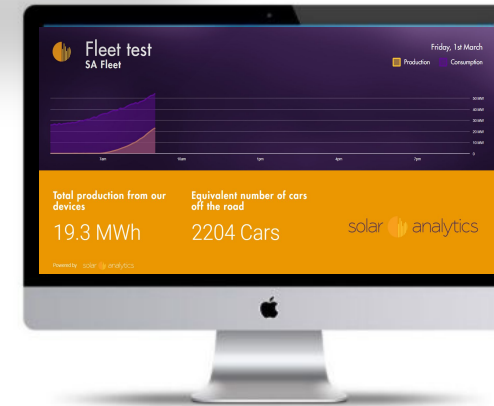

- Multiple Solar Analytics sites from a fleet or cluster of fleets
- Single static page
- Production, consumption & customisable widgets

Custom Multi Page Display

Custom multi page display

- Up to twenty auto rotating pages
- Choose a mix of custom page, fleet or cluster of sites
- Add a selection of media types (not video)
- Production, consumption & customisable widgets

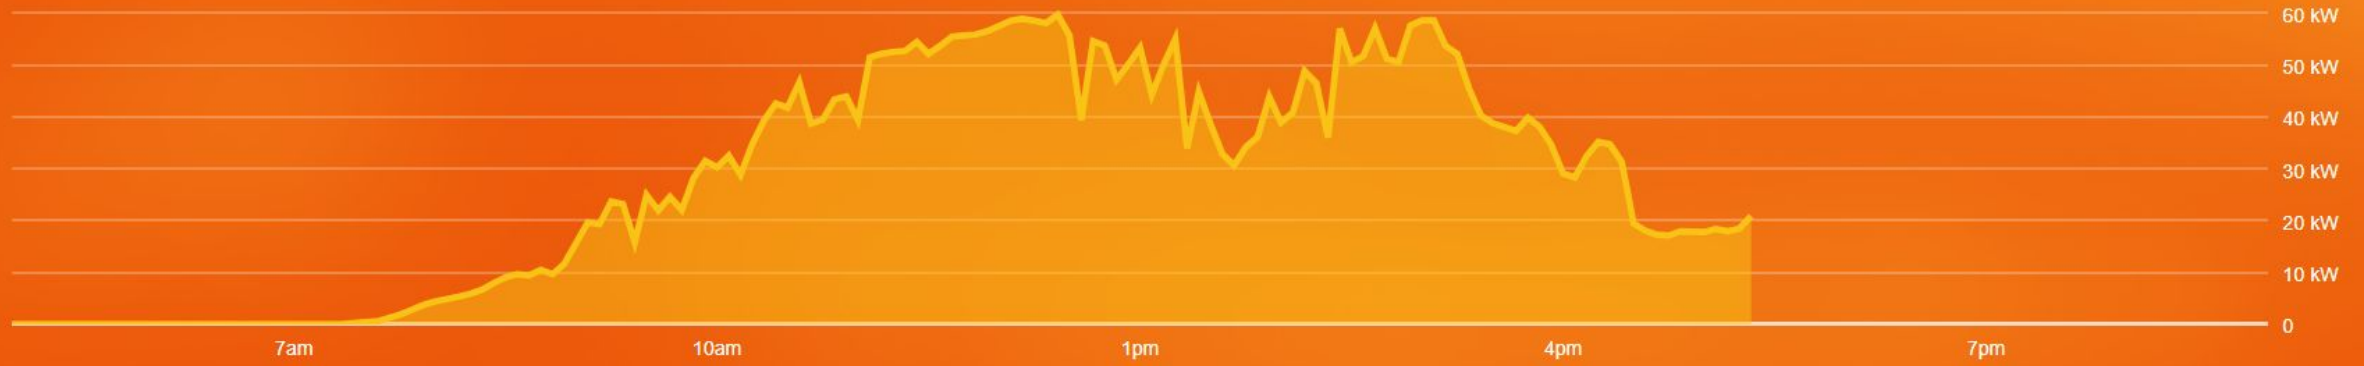

Custom Fleet Display

Bring your showroom to life!

- Ask our sales team about special deals on [Showroom Custom Displays](#) for your solar business!
- Customised for your company, designed to highlight features, values and benefits of Solar Analytics
- Large screen format to help you promote your credentials
- Up to 20 pages using our Custom Multi Page template

Today's total solar production

344.5 kWh

Equivalent to planting

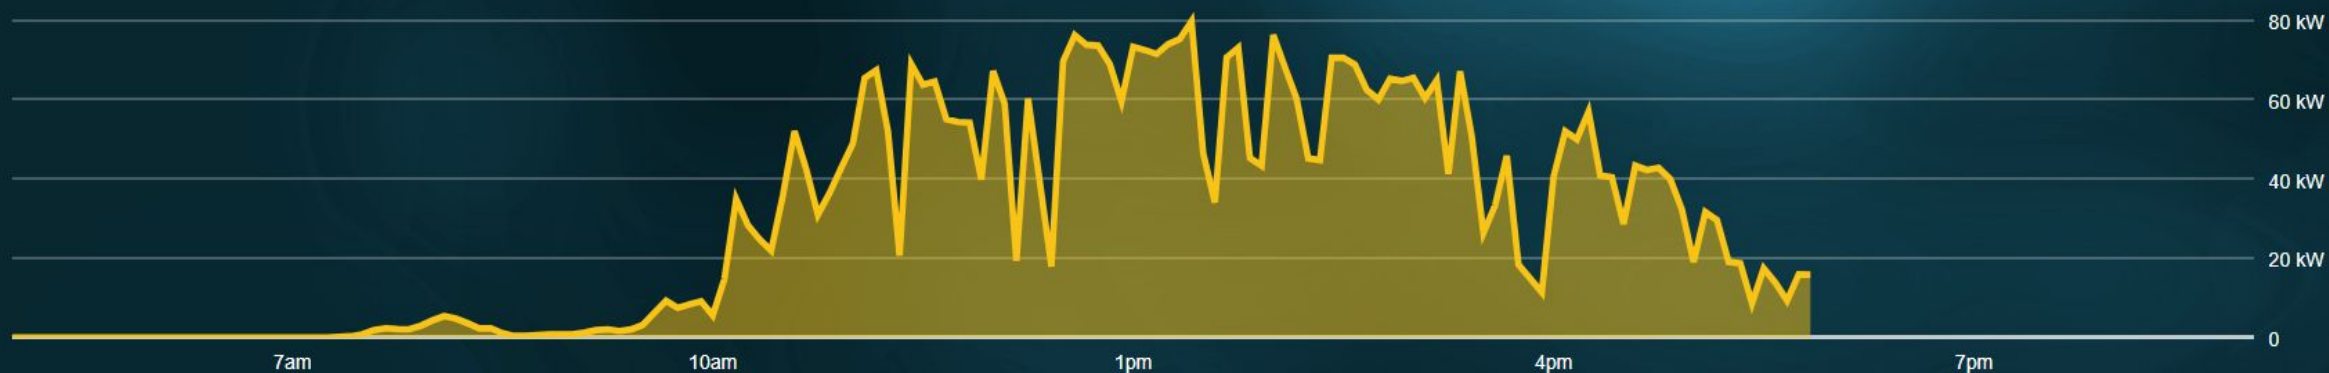

2298 trees

KINCOPPAL Solar Production

committed to renewables

Powered by solar analytics

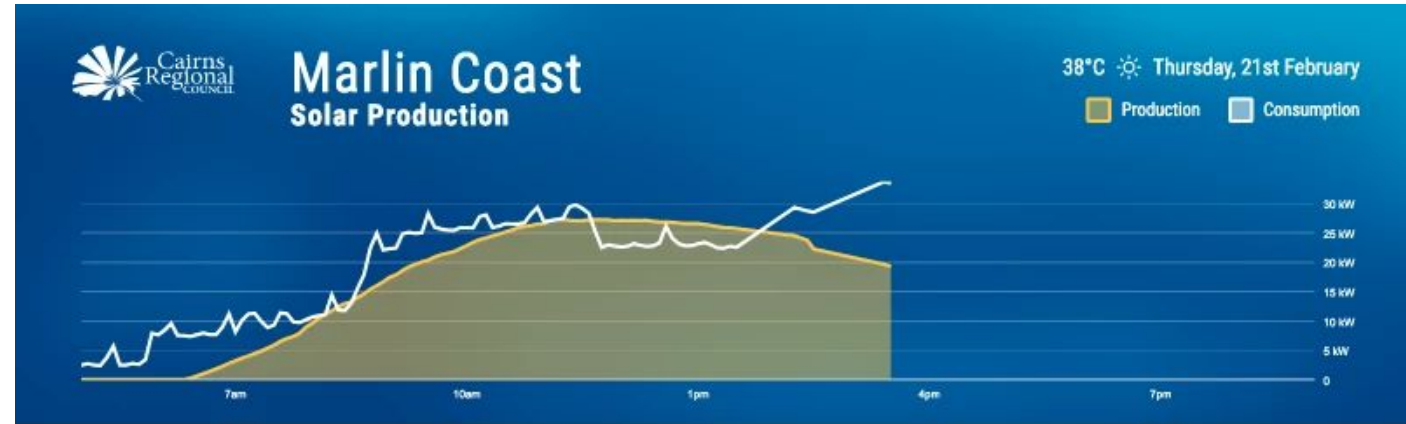

branding space

General

Choose from:

- Solar production and/or
- Energy consumption
- Consumption can be line or filled graph and colours selected by the client
- Daily display period 8am till 9pm

Today's total
solar production

181.6 kWh

Equivalent number
of cars off the road

20 cars

Powered by solar analytics

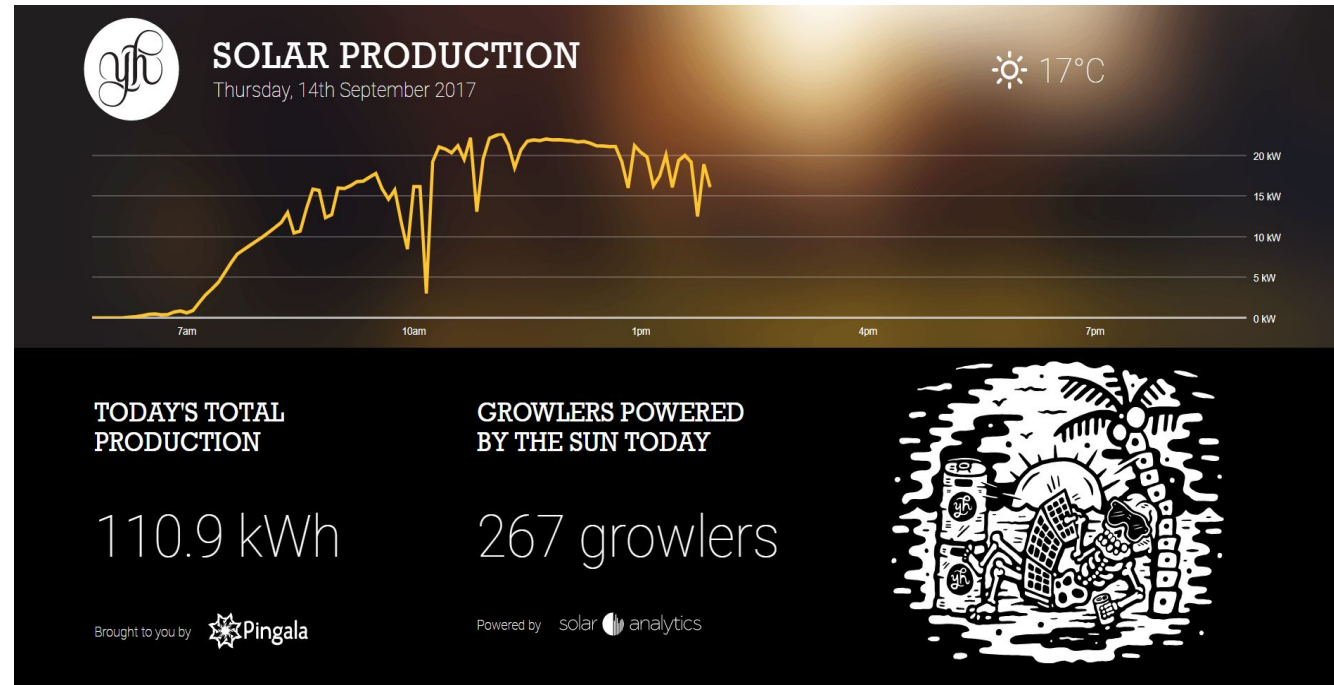

Notes

Time period for display is 5am till 9pm. Display resets to Zero at midnight.

Text widgets refreshes every 1 minute. Graphical data refreshes every 5 minutes

Page Display

- Live data
- Single static page
- Single site
- Production and/or consumption

Notes

Time period for display is 5am till 9pm. Display resets to Zero at midnight.

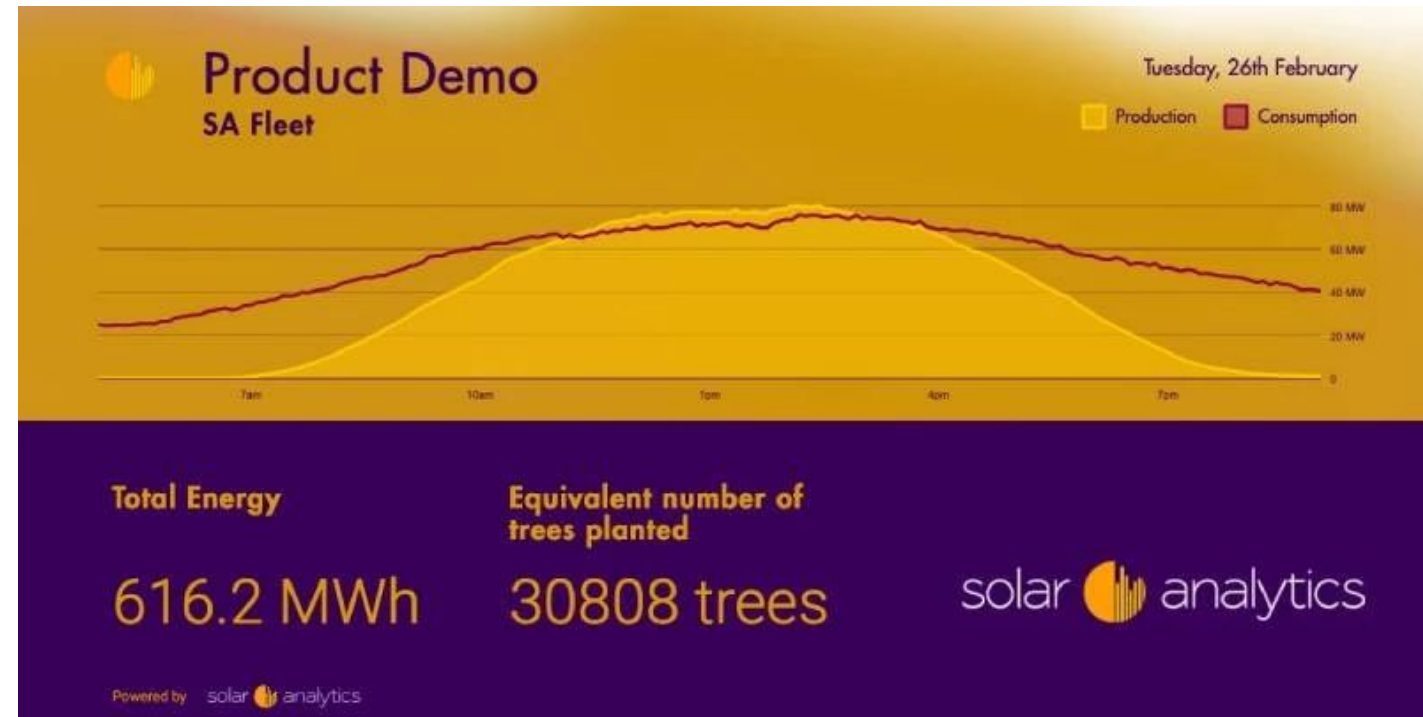

Widgets refreshes every 1 minute. Graphical data refreshes every 5 minutes

Fleet Display

- Live data
- Single static page
- Aggregated fleet of sites or, a aggregated cluster of sites from multiple fleets
- Fleet automatically grows as the fleet grows
- Cluster is a fixed number of sites
- Production and/or consumption

Notes

Large volumes of sites may result in rounding of some data

Multi-page Display

- Live data
- Up to 20 pages auto rotating
- Any combination of single, fleet or cluster data
- Include images, logos and text (not video)

Notes

Maximum page number is 20, 5 is recommended.

Default rotation is 10 seconds, but can be changed

Images should be high resolution and suitable to fill the entire page. No video.

Text message cannot exceed 50 characters.

Important terms and conditions

- Custom Displays attract a once off cost which includes design, customisation, custom URL and styling work.
- Replicas and or modifications are available at a discounted cost. Only applicable to sites with the same end user, logos and colour schemes.
- All Custom displays require the installation of Solar Analytics Hardware and active subscriptions
- Display of Production and or Consumption data is limited to that measured by Solar Analytics hardware
- Custom Displays are designed for use on large format smart TV's and are not suitable for embedding in web sites
- Multi Page displays have a standard auto rotation feature set to 10 seconds by default and adjustable on request
- Fleet displays pull data from all sites within a fleet
- Cluster displays pull data from nominated sites within multiple fleets
- Limitations apply to a number of custom variables available
- Graphical data is refreshed every 5 minutes during daylight hours only (5am till 9pm). Widget data is refreshed every 1 minute.
- Refer to Solar Analytics Resellers for pricing and further details

Important terms and conditions

- The display is built to be shown on a monitor in a public place, as such is best on a screen with a ratio of 16:9 (minimum resolution - HD 1280x720). It is flexible enough in layout that it can cater for high res screens but it is not fit for use on mobile or in a portrait layout.
- Default fonts are `roboto_condensed_bold` for the top section and `roboto_condensed_regular` for the bottom one. New fonts can be added if they are web safe and royalty free
- If Custom Displays are shown on more than 1 screen (i.e. in a school or corporate environment on multiple displays) users are limited to a maximum of 20 displays. Extra data charges may be applied if the 20 screen limit is breached.

Custom widgets are limited to the following:

- Homes powered by our solar system (multiplier of 0.06) homes.
- Equivalent to carbon absorbed by XXX trees (multiplier of 6.6) tonnes
- Equivalent number of cars off the road . (multiplier of 0.114) cars
- Kilograms of CO2 saved today (multiplier of 0.8565)Kg
